Project summary
Work will commence on improvements to the public car park in front of the Beerwah State High School. Carpark numbers will be increased by converting the existing gravel parallel parks (north side) to angled car parks.

Improvements will include:

- Kerbing, bitumen sealing and linemarking of the existing gravel section on the north side.
- Resealing and linemarking of the southern section of the car park
- Construction of pathways linking all car parking to the school, and
- Spaced tree planting along the frontage of Roberts Road.

Council will endeavour to avoid disturbing vegetation and in particular large and established trees. Some landscaping will be undertaken once work has been completed.

Commencement date
The project is programmed to start the week commencing 3 March 2014.

Project completion is anticipated within three weeks (weather dependent). Some work such as landscaping and pathways will be held off until the Easter School Holiday period to try and reduce the impact on the public.

Parking disruptions
During construction, existing car parking will be affected for short durations causing some disruption. Council will attempt to provide as much parking as safely possible at all times.

Traffic management
Your patience during construction is appreciated. Traffic management measures will be in place to ensure the safety of pedestrians and motorists.

Further information
Please contact council’s Project Officer, Neil Larsen on the details below.

A note from your local councillor
Roberts Road has two tremendous schools on either side of it which means that it’s critical that we manage the traffic through improved design. This car park project will improve the management of the traffic in the area and therefore student safety.

I thank the residents for their patience during construction.
